## **Wireless Flow Sensor**

Use this sensor to retrofit flow to existing systems that cross under asphalt, concrete, or other hardscapes.

## **KEY BENEFITS**

- Wireless flow sensor saves time, materials, and labour
- Simple-insertion flow sensor for monitoring and reacting to real-time flow conditions
- Provides flow monitoring for reaction to high- or lowflow conditions, helping to protect against waste and damage from leaks
- Compatible with Hunter I-Core<sup>™</sup>, ACC, and and ACC2 Controllers, plus ICC2 Communication modules for system-level flow monitoring
- Sensor is precalibrated for K-factor and Offset based on pipe size, allowing for quick setup and programming within the controller
- Multi-colour LED on the receiver indicates proper communication to the transmitter as well as remaining battery life

## **Operating Specifications**

Recommended pressure range: 0 to 15.0 bar; 0 to 1,500 kPa

• Pressure loss: < 0.009 bar; 0.9 kPa

Maximum distance sensor to receiver: 152 m
Operating frequency: 868 MHz or 900 MHz
