Simplify Installation with the Wireless Valve Link

When taking on a new installation or retrofit project, running wire from the controller to field valves can be time-consuming, labour-intensive, and expensive. The new Wireless Valve Link uses LoRa® Wireless Radio Technology so you can easily connect valves without running additional wires or cutting into hardscape, allowing you to save time, money, and effort.

New Product Contest Winner: MP Rotator® MP-820 Nozzle

The Hunter MP Rotator MP-820 Nozzle was recently named a New Product Contest winner at the 2024 Irrigation Show. This longer-radius option expands the coverage of the MP800 Nozzle Family up to 24', solidifying the product line as the optimal high-efficiency solution for spray retrofits and tight water windows.

Tech Tip: Hunter Pressure-Regulated Spray Sprinkler Bodies

Hunter Industries currently offers two types of pressure-regulated spray sprinkler bodies: the Pro-Spray™ PRS30 and the Pro-Spray PRS40. Recognised by EPA WaterSense® as water-saving tools for landscape irrigation, pressure-regulated spray sprinkler bodies enhance irrigation systems by regulating the water pressure equally at each head.
